INDEX TO THE GRANITE MONTHLY

Volumes 35 - 62

Charles H. Smith
State Director

This index was prepared by the Federal Writers' Project of New Hampshire, to whom credit must be given if the index is ever published.

This index is carried on from the point covered by an index, compiled under the direction of Otis G. Hammond, published in The same principles are followed in the present index and are as follows:

This index includes authors and titles of articles. An indexing authors the names have been given in the complete form in which they appear, and are printed in italics; the titles of articles follow each author's name. For economy of space the names of authors as used in the subject index are abbreviated, and are enclosed in parentheses.

No title of an article is to be regarded as bibliographically correct except in the list following the author's name. In all other cases the exact form of a title is subject to necessary change in order that the important feature of the article may be clearly and intelligibly indexed.

Charles Ernest White
State Director
